## **HeatMitt HEATED MITTENS USER INSTRUCTIONS**

### **WELCOME**

Your high performance HeatMitt heated mittens have been designed to provide warmth and comfort to enhance the safety and enjoyment of your outdoor activities and can even help to improve blood circulation in your hands and arms.

Our unique FabRoc™ heat technology provides the world's first self-regulating heating system. No external controller is required as the FabRoc™ itself will heat to the pre-set temperature of approximately 115 degrees Fahrenheit. Continuous use of 4-6 hours is available on a single charge of your small exo<sup>2</sup> 3.7 volt PowerPack.

### **PRODUCT CONTENTS**

- HeatMitt Heated Mittens (Pair)
- (2) Miniature PowerPacks (Rechargeable 3.7 Volt Lithium-Ion) - EXO37MR
- 2-Way Charger Unit - EXO42US2W

FabRoc™

## SETTING UP AND USING YOUR HEATMITTS

Your HeatMitt heated mittens are simple to set-up and use. Each pair comes supplied with individual 3.7 volt, lightweight miniature PowerPacks and will normally be charged and ready to use when received. Depressing the switch will light the LED to green, which indicates that power is available and the unit is now on. To operate your HeatMitts, simply insert the mitten 1.3mm plugs into the charged PowerPacks and then insert them into the integrated pockets.

To charge your HeatMitt PowerPacks, connect them to the supplied charger unit and plug them into a standard electrical outlet. Please ensure that the PowerPacks are switched **on** when being charged. The charger unit LED will light red until charging is complete, at which time the charger LED will change to green. The HeatMitt can then be unplugged and used normally. It will take several hours to charge the PowerPacks fully, however a fast charge, offering several hours of heat, can be achieved after just one hour of charging. **DO NOT LEAVE CHARGING BATTERIES UNATTENDED.**

## HEATMITT SPECIFICATIONS

6. Thinsulate™ Insulation - ***For Heat Retention***
7. Drawstring adjuster at gauntlet end - ***For Maximum Protection in all Weather Conditions***
8. Decorative Leather and exo<sup>2</sup> Embroidery Branding

## SAFETY FEATURES

**DO NOT** replace or interfere with the electrical components of your heated mittens, the batteries or charger unit.

The FabRoc™ heating element installed into your new HeatMitts has been designed for safe and reliable use. The power system has been tested to comply with US safety regulations and has been CE marked and UL certified. Safety devices are included to ensure the unit is rendered safe, even under faulty conditions.

**Please Note: The HeatMitt Heated Mittens are not designed to be used under water.**

## TROUBLESHOOTING

**What happens if my heated mittens are torn?**

**DO NOT** attempt to replace or interfere with the electrical components in the heated mittens. Return the item to **exo<sup>2</sup> The Heat Inside** for repair.

**What happens if my heated mittens do not get warm?**

Confirm that the mittens are properly connected to the supplied PowerPacks and that the LED on the PowerPacks shows green when switched on (indicating power is available). If they still do not get warm, contact **exo<sup>2</sup> The Heat Inside** at **877.exo2.HEAT**.

## WARRANTY

Every pair of heated mittens is supplied with a one-year warranty covering all electronic and mechanical failures. In the unlikely event that any part should fail because of a defect within the first year, return it to us and we will repair or replace it free of charge.

**Note: The warranty does not cover intentional alterations, accidental damage or improper cleaning.**
