

Bringing the internationally acclaimed FabRoc® to the equestrian industry

EXOGLO™

EXO²
The Heat Inside®
877-396-2432
www.exo2.com

The ExoGlo Heated Equine Rug uses the unique polymer heating system FabRoc® and provides scientifically proven, therapeutically beneficial heat.

The benefits

- Warms up and loosens muscles prior to exercise or massage
- Helps reduce the risk of muscle injury
- Helps reduce muscle stiffness and increases flexibility
- Helps to improve performance
- Drug free modality to use before a competition
- Keeps muscles warm when competing, lessening warm-up time between activities eg Show jumping – first round and a jump off
- Use after exercise to stop muscles cooling down too fast - helps prevent typing-up
- Helps in muscle injury as part of a recovery program
- Helps relieve pain from muscle spasm and related tightness
- Keeps core temperature steady in post surgery situations
- Helps prevent muscle injuries while travelling
- Works as a relaxation aid for stressful situations

The statistics

- 4 heating panels – one on each quad
- Total heated area – 4860cm sq of FabRoc®
- FabRoc® set to a maximum temperature of 55° C
- FabRoc® exhibits a positive temperature coefficient - no hotspots
- FabRoc® FIR technology - heats muscles to a depth of 4cm not just the surface of the skin
- FabRoc® has a lifetime guarantee

The flexibility

- Can heat all 4 quads or any combination of the 4
- Can independently raise or lower the temperature of each quad
- Can heat all 4 quads for a maximum of 4 hours on high temperature and 9 hours plus on low temperature
- Longer heating times when less quads heated
- Longer heating times when only a selected quad is needed for specific injuries

OUR RECOMMENDATION
Allow 20 mins warm-up prior to exercise, massage or in case of an acute injury
